Meteor Light 2 & 3-Pitching Instructions

In order to familiarize yourself with your new tent, we recommend you “test pitch” it before embarking on your wilderness adventure. For more helpful tips, go to www.sierradesigns.com/tents.html

Package Includes: Tent Body, Rain Fly, 2 Poles, 4 Guy Cords, 7 Ground Stakes, 1 Pole Sack & 1 Stake Sack.

Step 1: Find an even piece of ground, stake out your tent and assemble the poles. The patent pending Eye Pole Configuration™ acts like a spring, be sure to depress the last section of pole and fully seat them together. (Reverse this process when taking the tent down after camping)

Step 2: Slide the single pole through its sleeve and connect the tips into the corresponding grommets.

Step 3: Connect the Eye Pole™ into its grommets and attach the remaining Swift Clips™.

Step 4: Lay the rain fly over the tent and connect the four side-release buckles at each corner of the tent. Stake out the vestibules and admire your new tent.
