Step 1: Find an even piece of ground, stake out your tent and assemble the poles. Be sure that the poles are fully seated together for a quick and sturdy pitch.

Step 2: Slide both the longer silver/black poles with the Swivel C Connectors™ through the mesh sleeves and insert the pole end Ball Connectors™ into the tents Jake's Foot™ attachments located in the middle of the tent.

Step 3: Secure the remaining black poles to the front and back corner Jake's Foot™ attachments running along both sides of the tent. Then connect the black poles to the front side of the silver/black poles by snapping them into the Swivel C Connectors™ and clip the remaining Swift Clips™ to the black poles.

Step 4: Position the rain fly over the tent so that the vestibule doors are in line with the main tent body doors. Next, attach the rain fly clips to the front bar of the Jake's Foot™ attachment, stake out the vestibules and admire your new tent.

Wu Hu 4 & 6-Pitching Instructions

In order to familiarize yourself with your new tent, we recommend you “test pitch” it before embarking on your wilderness adventure. For more helpful tips, go to www.sierradesigns.com/tents.html
