SNO-SEAL® ORIGINAL BEESWAX WATERPROOFING PROTECTS LEATHER FROM RAIN, SUN, SNOW, AND SALT

1333B

- Enjoy dry feet all year.
- Prevents water from penetrating leather because: it fills the follicles of the leather, and it soaks deep into the grain of the leather, where snow, rain, grass, or dirt cannot affect it.
- Lubricates and conditions leather without softening.
- Preserves and lengthens the life of leather.
- Does not interfere with the natural breathability of leather.
- Is extremely resistant to salt stains and spotting.
- No softening effect on heel counters or box toes, important in order to maintain fit, form, and support.
- No damaging effect on seams (nylon, polyester, cotton, etc.) or welts (Norwegian, Goodyear, cemented).
- Maintains flexibility at 0 degree temperatures and does not crack during continual flexing of leather.
- Does not deteriorate like animal fats (mink oil, lanolin, etc.).
- Contains no silicone.

The Sno-Seal® beeswax formula dries to a solid wax that “stays put” in the surface of the leather so it lasts longer. Greases, oils, and animal products are able to migrate through the leather till they clog all the pores. They fill the natural lattice spaces that are supposed to insulate and absorb perspiration. Your foot feels clammy before the boot even leaks and the stains on your socks prove your waterproofing is in the wrong place. Animal fats and oils weaken and rot leather. The tannery removed the fats to preserve the leather. Sno-Seal® will also make you warmer and more comfortable in Gore-Tex® fabric lined boots. The Gore-Tex® fabric liner may keep water from reaching your foot but if the boot is soaked with water it can't breathe. The wet leather pulls heat from your foot and your feet feel wet and cold. Each boot can soak up a pound of water. Sno-Seal® keeps the whole boot dry, warm and light. Sno-Seal® also protects leather from drying out and keeps leather flexible and strong in the driest desert climate. Ice skate soles should be treated especially along edges and blade mounts.

Black Sno-Seal, Item 1331BK, contains black colorant to better cover scratches and scuffs on black boots.

13366

SHOE & BOOT FAST DRY REPELLENT

Light but effective silicone formula for protection with no risk of color change. Dries quickly to eliminate staining. Invisible protection for suede and exotic shoes and boots, ties, jackets and purses. Multiple treatments can build high repellency.

WELT-SEAL®

Formulated to seal exposed footwear welts and also to protect them against abrasion and weld spatter damage.

- Squeeze tube with applicator tip.
- Outstanding sealing ability.
- Excellent adhesive quality.
- Repair leather, neoprene, vinyl, and other flexible material.

13339

WATER-GUARD® EXTREME

Maximum water repellency plus an invisible treatment that resists UV damage, odor and discoloration caused by mold, mildew, fungi and algae. Choose for continuous outdoor exposure. Protects everything from artificial flowers to genuine rock. Recommended for Sunbrella™ and all outdoor fabrics. Maximum repellency for breathable treatment. Extra protection from ultraviolet fading and damage. Use on Awnings, boat covers, umbrellas, outdoor wood, masonry, and furniture. Choose when maximum performance outweighs concern for appearance change. Delivers 33% more usable product than competing products of the same size and weight using Propane/Isobutane propellant. Reduces carbon by 97% compared to hydrocarbon propellents.

PRESSURE SPRAYER - 1 LITER (34 oz)

For larger waterproofing projects, use the pressure sprayer with the Water-Guard products. Item # 34921

PERMANENT WATER-GUARD®

Trigger spray formula optimized for cotton and blends. Aerosol spray formula optimized for 100% SYNTHETIC fibers.

GUARANTEED TO BEAD WATER AFTER 25 WASHINGS IN SPORT-WASH®.

NON FLAMMABLE, NO SOLVENTS, NO VOC's.

- Safe for all washable fabrics.
- Safe for Down and all insulations.
- Water beads up, runs off, leaving fabric dry & breathable.
- Dries odor free.
- Resists water borne and oil borne stains.
- Leaves fabric soft and quiet.
- Non-Yellowing.

Aerosol can uses Safe CO2 as propellant. Permanent Water-Guard® is a polymer surface treatment applied in a water system without solvents, silicone, waxes, or any other extenders. Permanent Water-guard is the most effective and durable water based repellent you can apply. It is compatible with all washable fabrics and performs best when heat activated with an iron or clothes dryer. When applied according to directions on fabric that can be washed and ironed, Permanent Water-Guard® will exceed the performance of factory applied water repellents.

1357

1336XGAL

1336X

SILICONE WATER-GUARD® Water Repellent

- Heavy Duty Water Repellent. Only one treatment needed.
- For all fabrics, suede, and brushed leather.
- Heavy duty formula for absorbent natural fibers, nylon, polyester, blends, fleece, and coated fabrics. Safe to use on Gore-Tex® lined outerwear and footwear.
- Allows materials to breathe.
- Odor free when cured.
- Excellent performance with minimal discoloration.
- Resists salt stains.
- Restores and replaces factory waterproofing on silicone impregnated leather boots.
- Silicone Water-Guard® contains cross-linking polymers and is the highest quality water-repellent available. Delivers 33% more usable product than competing products of the same weight using Propane/Isobutane propellant. Reduces carbon by 97% compared to hydrocarbon propellents.

Contains no Propane Isobutane Gas (Hydrocarbon) Propellant, Other brands add 2-3 ounces of “Extremely Flammable” Hydrocarbon Propellants to their products weight statement. We use 1/3 ounce of safe CO2 as our propellant.

The 4 oz. dauber jar of Silicone Water-Guard® is specially formulated for footwear.

1337

1336GAL

1336

SPORT-WASH®
RESIDUE FREE LAUNDRY DETERGENT RINSES COMPLETELY. DESTROYS ODOR. ELIMINATES RASH, REDNESS, AND SKIN IRRITATION.

- Destroys Odors.
- Contains no fabric softener, UV brighteners, enzymes or fragrance.
- No detergent, not even Sport-Wash®, can remove UV brighteners. If brighteners are present, a single treatment with U-V-Killer® will stop the glow permanently.
- Restores Performance features of High Tech Fabrics.
- Rinses completely leaving no residue for animals to smell.
- Optimize performance of carbon, silver, zeolite and all oxidizer odor control systems.
- Cleans and deodorizes. Leaves no scent.
- Restores loft and effectiveness to down and synthetic insulation.
- Restores wicking, breathability and rapid dry.
- Recommended for H.E. and standard washers.
- Restores factory applied DWR type water repellents.
- Helps frequently washed garments like exercise wear last longer.
- Contains no bleach, phosphate, fabric softener or enzymes.
- Readily biodegradable / septic safe. For all washables.
- Sport-Wash Carbon Care® is exactly the same as regular Sport-Wash®, except for the label which addresses the special care of carbon suits.

SPORT-WASH® HAIR & BODY SOAP
Eliminate human scent without cover scent.

The only Residue-Free Shampoo and Body cleanser. Sport-Wash® Hair & Body Soap is a clear gel. It creates rich lather to leave hair, skin, and scalp so clean it takes hours for odor causing bacteria to reappear. By rinsing completely it leaves nothing behind to alert game, attract insects, or irritate skin. Even after weeks of regular use, it leaves you squeaky clean because it does not build a residue.

Other brands distinguish themselves by what they leave behind. You can feel it and smell it. These chemicals are easily detected by game animals and are far more obvious than the human scent you are trying to wash away. Soap residue also nourishes re-growth of odor causing bacteria. Eliminate it all with Residue-Free Sport-Wash® Hair & Body Soap.

N-O-DOR® SHOE AND BOOT DEODORIZING POWDER

Effective odor control without exposure to fragrances or antiperspirants. Use once a week to keep the nastiest shoes and boots under control. Contains Abscents™.

SHOE & BOOT FOAMING CLEANER

Instant foam to lift dirt without soaking. For fabric and leather shoes and boots. Clean sneakers and sport equipment without deep soaking. Great all purpose foaming cleaner.

N-O-DOR® OXIDIZER LIQUID ODOR DESTROYER

N-O-DOR® spray deodorizes clothing, hair, skin, breath, and all wettable surfaces quickly and safely by permanently oxidizing all organic molecules into odorless non-volatile compounds. Always fresh because you don't activate it until you are ready to use it. N-O-DOR® does not mask odors, but totally destroys them. The unique packaging assures absolute freshness with economy and ease of use. With N-O-DOR®, you are able to remain scent free all day. N-O-DOR® deodorizes all sports equipment, coolers, body armor, pet accidents, bathrooms, nurseries, and vehicles. Never cast a lure without deodorizing it with N-O-DOR®. The triple action oxidizer destroys odor molecules, the organisms that produce them, and the organic debris they feed upon.

N-O-DOR® OXIDIZER PRO PUMP REFILL KIT

An economical refill kit for the N-O-DOR® Oxidizer Pro Pump Kit. Makes over a gallon. Always fresh because you mix it when you need it.

N-O-DOR® II POWDER

N-O-DOR® II is 100 times more effective than carbon in adsorbing odor molecules. N-O-DOR® II captures and permanently holds odor causing molecules. N-O-DOR® II will maximize Carbon Suits by increasing the adsorbing capacity in real world hunting conditions of low concentrations but increasing temperature and humidity. Storing a carbon suit in a sealed bag with a tablespoon of N-O-DOR® II Powder actually increases its capacity to eliminate odors. N-O-DOR® II is excellent in boots and storage bags and for powdering skin and clothing. The active ingredient in N-O-DOR® II Powder is Abscents™ crystals, an absorber which soaks up every trace of odor into permanent storage. This powder performs wet or dry and washes away easily.

N-O-DOR® OXIDIZER PRO PUMP KIT

A & B concentrate mix with your water to create N-O-Odor Oxidizer.

The fastest and most convenient way to ensure complete odor control coverage. N-O-DOR® uses nature's own process for destroying organic wastes. The unique package makes it possible for the hunter or outdoorsman to achieve on the spot odor control conveniently and economically. N-O-DOR® does not eliminate the need for cleaning your clothes and body, but rather provides a way to remove every trace of odor from your clothes & body while in the field.

Nature has always cleaned up her spent organic debris by oxidation. Now you can apply the same process whenever necessary.

N-O-DOR® will also destroy odors in your car, home or wherever a problem exists.

Liquid N-O-DOR® is the freshest and most effective scent eliminator spray available. This kit makes 4 liters (over a gallon) of Oxidizer, one liter at a time for maximum freshness. The system has been extensively field tested and modified based on feedback from successful users to maximize effectiveness, convenience and value.

N-O-DOR® has a shelf life of 4 years before mixing. After mixing (activation) it will remain effective for 6 to 12 months depending on storage conditions. Includes a pocket sprayer, Four 4 oz. bottles of each A & B, a 4 oz. bottle of Sport-Wash® Laundry Detergent and a 4 oz. tube of Sport-Wash® Hair & Body Soap.

RAPID-ROD®

Emergency field cleaning rod

- Folds to fit in your shirt pocket.
- No loose pieces.
- Weighs only 2 ounces.
- Fits rifles from .22 cal. and up with 26" barrel.
- Fits shotguns from 20 gauge and up with 30" barrel.
- All standard 8-32 cleaning attachments will fit.

Rapid-Rod® will keep your Barrel Clear and Safe.

Obstructions such as mud, snow, dirt, ice, shotgun wadding, shell casings or a bullet can and do get lodged in chambers and barrels. This dangerous and frustrating situation renders your weapon useless until cleared.

Rapid-Rod® will quickly, quietly, and safely clear all obstructions and save your day in the field.

1337AT

SILICONE WATER-GUARD® ARROW TREATMENT

Absorbed moisture changes the weight and flight of arrows.

Silicone Water-Guard® Arrow Treatment protects

feather fletchings from water and weight gain. Minimizes changes caused by weather. Aids removal from targets. Excellent for dipping dry flies to keep them floating high.

U-V-BLOCK® BOWSTRING WAX

100% beeswax with ultraviolet absorbent dye. Other brands actually glow with ultraviolet light because they contain paraffin, microcrystalline, or petrolatum. For all synthetic and natural bowstrings. Extends life of string by reducing fraying and wear. Lasts longer than synthetic waxes. Threaded jar maintains softness for easy application. Use it on your fly line to keep it floating high.

1344

U-V-KILLER® TREATED BLAZE ORANGE VEST

U-V-Killer® Treated Blaze Orange Vest is seen as a dark shade of yellow by deer and other dichromats while appearing as bright, blaze orange to the human eye. One size fits all with elastic side straps and velcro front straps.

Deer see untreated blaze orange as blue white. U-V-Killer kills the ultraviolet fluorescence glow on this blaze orange vest and increases the fade resistance of the high-visibility orange. It is sealed in a factory-applied fluorocarbon water and stain repellent. It allows you to be safe, legal, and still invisible to animals. This 600-sq. in. vest meets the Hunter Education Recommendations. Eliminates ultraviolet glow that game can see. Still easy to see by humans. 100% acrylic. Made in the USA. Keeps you safe and legal, but less visible to deer.

1000

1009

U-V-KILLER® CAMO VEST

Seen as camouflage by deer and 100% solid orange by humans

Viewed by humans in daylight, U-V-Killer® Camo Vest appears to be identical to ordinary blaze orange. You are safe and legal but U-V-Killer® Camo Vest won't spook animals. Viewed by deer in daylight, U-V-Killer® Camo Vest is a dull yellow and brown camouflage that breaks up your image.

13416

UV FLASHLIGHT

Includes 4 AA batteries. Don't guess! Check all your clothing and gear with an ultraviolet light source. Enables humans to determine if brighteners are present in camo, blaze orange, detergents, etc. Light is 6" 350 BLB.

"Garments can reflect (or emit) considerable light in wavelengths near 430-440 nm (such as those emitted by UV brighteners). Because of the deer's high relative sensitivity to short wavelength light, the presence of blue, violet and UV components would make a garment stand out as both bright and colored against natural backgrounds. Those same components could be barely noticeable to humans." Dr. Jay Neitz.

UV FIXTURE

Don't guess! Check all your clothing and gear with an ultraviolet light source. Enables humans to determine if brighteners are present in camo, blaze orange, detergents, etc.

Light is 18" 350 BLB. This fixture has a 3 foot 110v cord.

13418

1341Q

U-V-KILLER®

The only product that can permanently eliminate the glow seen by animals.

Check it, treat it, and see more animals.

Animals can see the ultraviolet powered glow even if you don't move.

For camo and blaze orange.

All game animals, fish, and birds see UV and short blue wavelengths of light thousands of times brighter than humans. U-V-Killer® absorbs UV energy so it can't power-up the brighteners in material that has been treated.

Garments treated with U-V-Killer® may be washed again and again with Sport-Wash®, but a single washing in regular detergent will apply a new dose of UV brightening dye.

1343

U-V-SHIELD®

A durable outdoor clear coat with ultra-violet absorbent dye. For all painted surfaces, metal, wood, and plastic.

Tree-stands, decoys, arrow nocks, archery equipment, etc. Many plastics, coatings and paints reflect UV light for protection or to appear brighter or more attractive to humans. In the wild these are visually shocking to game animals, insects and birds.

U-V-Shield® is a durable acrylic coating that kills the U-V glow. Properly applied, it dries to a hard clear satin finish. U-V-Shield® provides protection from UV damage.

13413

GLOW TEST KIT (UV Light, DVD, Book)

Learn how to test all your camo, blaze orange and gear for UV glow. The Glow Kit provides detailed info for deer vision and how to use a UV light to detect the brighteners they see.

Detection kit contains a custom made 370-390 nanometers LED black light, the book "How Game Animals See" and the DVD "Whitetail Sight and Scent Strategies".

1360

SCENT AND UV CONTROL SYSTEM

The Scent & UV-Control System contains our 16 oz. N-O-DOR® Spray, Sport-Wash® Hair & Body Soap, Sport-Wash® Laundry Detergent, and U-V-Killer® to eliminate Odors and Stop UV-Glow. Includes a reusable clear vinyl zipper bag with handle.

1342

SPORT-WASH® AND U-V-KILLER® COMBO

U-V-Killer® eliminates the Ultraviolet powered glow that animals see.

All game animals, fish, and birds see UV and Short Blue wavelengths of light thousands of times brighter than humans.

Garments treated with U-V-Killer® may be washed again and again with Sport-Wash®, but a single washing in regular detergent will apply a new dose of UV brightening dye.

SPORT SHOE CARE KIT

Everything you need to clean, deodorize and protect sport/athletic shoes. Includes a 5.5 oz. Shoe & Boot Water Repellent, 6.75 oz. Shoe & Boot Foaming Cleaner and a 4 oz. Shoe & Boot Deodorizing Powder.

1361

SCENT CONTROL SYSTEM

The scent control system includes 16 oz. N-O-DOR® spray, 16 oz. Sport-Wash® Hair & Body Soap and an 18 oz. Sport-Wash® Laundry Detergent. Developed to work together for total odor control. Includes a reusable clear vinyl zipper bag with handle.

1340

OUTDOORSMAN'S GIFT PACK

The complete kit to waterproof, protect, restore and care for all outdoor footwear, clothing, and gear. A unique gift for any occasion. Each pack contains one 7oz. jar of Sno-Seal®, one 4 oz. tube of Sport-Wash Hair & Body Soap, one 10.5 oz. aerosol Silicone Water-Guard®, one 3.5 oz. jar or Pro-Tech-Skin®, and one 18 oz. bottle of Sport-Wash® laundry detergent.

1363

1392

N-O-DOR® OXIDIZER PET CLEANUP KIT

Two part unscented system to clean and deodorize. Does not mask or cover odor. Use on carpet, furniture, dog beds, bird cages, litter box, etc. Works on all organic odors including urine, feces, vomit, and skunk spray.

This kit contains:

- Four bottles of each A and B concentrate to make four 34 oz. (1 liter) batches of deodorizer.
- One - 1 liter pressure spray bottle for easy application.
- One - 4 oz. bottle of cleaner concentrate to pre-clean before deodorizing.

N-O-DOR® PET SHAMPOO

N-O-DOR® Pet Shampoo Unscented: Because your pet doesn't like perfume. If you wash him with scented shampoos he must roll in the grass or dirt to rid himself of the smell. N-O-DOR® Pet Shampoo has no fragrance. You and your pet will love it. It washes away fleas and ticks without insecticide yet it's mild enough for frequent use. N-O-DOR® Pet Shampoo is even recommended for newborn puppies and kittens. No Scent, No Medication, No Insecticide, No Residue, No Irritation.

1396

CareTex™ Science Driven Solutions

CareTex™, the equine and pet division of Atsko Inc., provides science driven solutions to maximize the performance and durability of horse and pet wear.

From horse blankets to dog beds, textile and leather items require cleaning, deodorizing, and waterproofing to keep horses and pets dry, warm, and happy.

CareTex™ products are environmentally friendly and made in the USA.

CARETEX™ BLANKET WASH

CareTex™ Blanket Wash is safe for all waterproof-breathable blankets, sheets, rugs and pads. It rinses completely so there is no soap residue to degrade factory durable water repellents (DWR). Blanket wash cleans and deodorizes all turnouts, beds, coats, and other washable pet items.

CARETEX™ WATERPROOF PLUS

CareTex™ Waterproof Plus is the ultimate waterproofer for horse blankets and all turnouts. Waterproof Plus will keep your horse dry when no other repellent will work. You can enjoy a few more seasons or years before you have to replace your expensive horse turnouts.

1526

1538

13504

13501

Sport-Wash and Sensi-Clean are the same detergent. All the features, claims, and benefits of each apply to both. Sport-Wash Hair & Body Soap and Sensi-Clean Shampoo and Body Gel are the same cleanser.

SENSI-CLEAN® SHAMPOO AND BODY GEL

1355

Exceeds hypoallergenic by leaving no residue at all.

The only unscented, free rinsing shampoo and body soap. Safe and economical for daily use. A clear gel that produces rich lather to leave hair, scalp, and skin so clean it takes hours for odor causing bacteria to reappear. Sensi-Clean® Shampoo and Body Gel avoids all non-cleaning additives and is formulated for complete rinsability. It is suitable for daily use and will clear up skin irritations caused by the residues of other brands. Sensi-Clean® Shampoo and Body Gel is recommended for people with sensitive skin and is great for children. People who suffer from allergies will appreciate the comfort of clean skin and hair while those who want oils and conditioners will find them more effective if applied after washing with Sensi-Clean® Shampoo and Body Gel.

SENSI-CLEAN®

Residue free laundry detergent rinses completely. Eliminates rash, redness, and skin irritation.

Chemical sensitive people are seeking products that are "Free of perfumes and dyes". It is totally free of dyes, enzymes, fragrance, phosphates, polymers, oxidizers, color, fluorescent whiteners, and lubricants. Sensi-Clean® leaves nothing behind but clean, naturally soft fabric. You can feel, see, and smell the difference.

Wool, silk, cotton, and all delicate fabrics and colors can now be clean and odor free without damage. Down and insulation material fluff up like new. Repeated washings increase the flame resistance of children's sleepwear made from 100% polyester. Skin irritation, redness or rashes caused by detergent residue and fabric softeners are eliminated by Sensi-Clean®. Clothes and fabrics feel sensuously soft without the use of expensive softeners. Works well in hot or cold, hard or soft water. Biodegradable. Phosphate Free.

23442

U-V-BLOCK® SUN PROTECTION

U-V-Block® stops the sun's damaging rays before they penetrate your clothing and reach your skin. Light summer fabrics offer little protection against UVB (which causes tanning), and even less protection against UVA (which causes skin damage). A white cotton t-shirt may provide a UPF (ultraviolet protection factor) of only 5 when dry and even less when wet. U-V-Block® turns ordinary fabrics into serious UVA and UVB protection. One easy application increases the UPF of a thin white cotton t-shirt from 5 dry (3 wet) to 50+ wet or dry, permanently. U-V-Block® is so effective it actually prevents fading and makes the fabric last longer too. U-V-Block® has no fragrance. Our 17 oz. bottle permanently treats 4-6 lightweight garments. Use on sun umbrellas and stroller shades for increased protection. Also extends the life and colors of flags, awnings, tents, and covers that are exposed to the sun. Our 1 quart bottle targets boat covers, flags, campers, tents, and all outdoor fabrics.

2344

PRO-TECH-SKIN ... LETS YOUR BODY HEAL ITSELF

Pro-Tech-Skin® is different. Other skin care products are water-soluble. They offer little protection against water and waterborne irritants such as soaps and household chemicals. They contain long lists of ingredients, many of which are irritating. Often these chemicals are homogenized or emulsified for suspension in water. This reduction in particle size makes them more invasive. Finally, after their water has evaporated, such products actually draw additional moisture from your skin.

Use Pro-Tech-Skin® very sparingly. Spread it to a thin film of protection by rubbing it in. If it takes more than a few minutes for the stickiness to disappear, you have applied too much.

Before Pro-Tech-Skin

After Pro-Tech-Skin

1352

1352S

13521

PRO-TECH-SKIN®

Heavy Duty protection for hard-working skin.

Apply to hands, face, feet, knees, elbows, friction spots, lips. Only a light application is necessary because Pro-Tech-Skin® contains no water. Beeswax formula resists the harmful effects of washing and abrasion. First wash and dry area then immediately apply Pro-Tech-Skin®. Apply before exposure to grease, dirt, glue, paint, etc. to make clean up easier and less damaging to hands. Apply before outdoor exposure to help prevent cracking and peeling. Keeps hands and feet warmer by reducing evaporation.

Pro-Tech-Skin® has no perfume, protein, or vitamin. Simply by protecting skin from further damage and retaining natural moisture, Pro-Tech-Skin® will enable your skin to heal itself. Your hands will look and feel healthier immediately and continue to improve as natural healing occurs. Pro-Tech-Skin® uses natural Beeswax to protect skin from dehydration, washing and friction. If your hands and feet are dry, red, raw, chapped, cracked, blistered, or calloused use Pro-Tech-Skin®. For over 70 years Sno-Seal® has protected the world's hard working leather. Now Pro-Tech-Skin® gives the same protection to your hard-working skin.
