

How To Determine Ring Size

Make the moment perfect with a ring that fits. When you visit our store, you will be able to use our sizers to determine accurate measurements. If you are unable to come in, or want to keep the proposal a secret, use one of these options below!

CONFIRM PRINTED PAPER SIZE

Use a ruler to ensure the line above is exactly 2 inches or 50 mm. If it is not, make sure you have printed this document at 100% on U.S. Letter-sized paper.

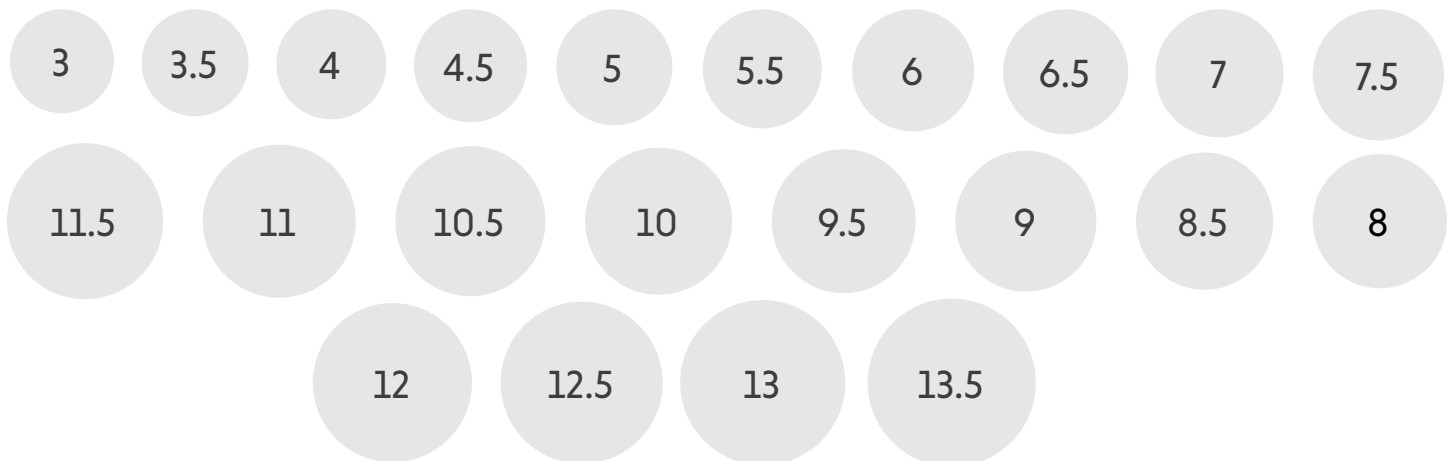

GET A FREE RING SIZER

Measure accurately at home with a jeweler-grade ring sizer. Need to keep it a secret? Ask a friend or relative with a similarly sized hand to take her or his own measurement to compare. Order your free ring sizer here:

Measure A Current Ring

- "Borrow" a ring she or he currently wears. Make sure it's from the correct hand and finger, as finger sizes can vary.
- Lay the ring over the circles below until you find the size that most closely matches the current ring. Base the measurement off the interior of the ring.
- Note that Icing On The Ring offers 1/4 sizes if the ring falls between two circles. Choose the larger size if you are unsure.

Tips For Secrecy

Ask friends or relatives (especially a parent or best friend) if they know her or his ring size. Or ask that person to go shopping with your significant other and encourage her or him to try on rings in order to report back to you. If you guess, err on the larger side as it's easier to make a ring smaller than larger, plus, a larger engagement ring will at least slide on her finger when you propose.

Our Free Ring Sizing Policy

We offer 1 free resizing in the first year after purchase. To preserve the integrity of the ring, we can only resize within one full finger size, up or down. This service may take up to two weeks to complete. If you're in the area, drop off your ring with us and we will contact you when it's ready for pick up. If you can't come in person, ship your ring to us and we will cover the return shipping.
